

Creating End-to-End Surveillance Solutions with DW Spectrum VMS and Wasabi Surveillance Cloud

Digital Watchdog (DW) is a leading manufacturer of complete surveillance solutions, offering stunning image quality, advanced hardware capabilities, and superior video management for any application. These intelligent video surveillance cameras and analytical applications are capturing more evidence than ever, causing an increase in storage capacity requirements. The demand for high-capacity storage that is fast, secure, and affordable is greater than ever. Many organizations don't have the resources or expertise to manage exponential increases of video data while trying to combat ever-evolving security threats.

By leveraging a combination of on-prem and cloud technology, Wasabi Surveillance Cloud with DW Spectrum VMS provides a highly secure repository that supports high camera counts, high-definition resolutions, high frame rates, and long retention periods. This architecture is designed to provide high reliability and accessibility to meet the demands of video surveillance deployments.

Scalable Video Management for Your Business

DW Spectrum is a lightning fast, easy to use, cross-platform video management software. This solution is designed to discover, view, record, and manage video cameras so you can monitor, analyze, and react to critical events in real time. DW Spectrum is a perfect solution for applications that require ease of use, speed, efficiency, and unprecedented image quality. The DW VMS works with Wasabi Surveillance Cloud to seamlessly transfer live recording and archive drives into bottomless storage without replacing or adding to existing infrastructure. Wasabi Surveillance Cloud allows users to easily extend existing on-prem storage capabilities and/or replicate on-prem data to protect against disaster. Users can instantly access recorded data from anywhere in a uniform secure file system appearing directly within the VMS.

Video Storage Costs That Are Predictable

From a cost perspective, DW Spectrum combined with Wasabi Surveillance Cloud provides a cloud storage environment optimized for high quality video surveillance infrastructures including high-definition and high megapixel environments. As camera and pixel counts continue to grow, Digital Watchdog paired with Wasabi Surveillance Cloud offers predictable surveillance costs. With no fees for egress or API calls, users can better plan for and optimize investments in surveillance with more flexible storage solutions that can grow as your needs change.

KEY FEATURES

- Seamless archiving of DW Spectrum video recordings to Wasabi cloud storage
- Scale your DW Spectrum video surveillance system to any size across any number of sites
- Completely transparent to DW Spectrum operators
- Complete end-to-end IP video solution

BENEFITS

- Easy to administer with simple and easy setup and configuration
- The flexibility of combining on-prem systems with the scalability of cloud storage
- Keep video integrity during defined retention periods
- Optimized for DW Spectrum video management software

Safe, Secure, and Tamper-Proof

Wasabi is deployed in fully secure and redundant data centers that are certified for SOC-2 and ISO 27001 compliance. The service is architected in accordance with industry-best security models and design practices. Organizations can configure storage buckets to be immutable for a user defined retention period (in increments of days, weeks, months or years). Designated video files written to that bucket cannot be deleted or altered in any way, by anyone, throughout its storage lifetime. Immutability can help with compliance for state and local government regulations.

About Digital Watchdog

Founded in 1988, DW is a leading manufacturer of complete surveillance solutions, offering stunning image quality, advanced hardware capabilities, superior video management, reliable customer support and the lowest total cost of deployment for IP megapixel, Universal HD over Coax megapixel and legacy analog applications. With offices in Cerritos, California and Tampa, Florida, and manufacturing facilities in Seoul, Korea, DW is committed to delivering powerful security solutions to its customers worldwide.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
