

Protect Your Customers' Data with Comet Backup and Wasabi

Securely Backup and Restore your Data on Wasabi Hot Cloud Storage

With the continued increase of ransomware and the business' reliance on digitized information and systems, managed backup services have never been more critical to business continuity.

Comet Backup was designed from the ground up with functionality and features specifically for service providers, with full rebranding and easy deployment options so you can not only build out your own custom backup environment but also ensure that your brand is at the forefront of it. Comet Backup provides fast & reliable backups because of its underlying 'chunking' technology, which means that your backups are incremental forever with no periodic full re-uploads.

Efficiency and security are the cornerstone of any backup platform. Comet Backup's client-side deduplication ensures that only data that is needed to be stored is uploaded, which helps to improve backup speed and reduce storage costs. When it comes to security, Comet Backup encrypts all user data during transit and at rest, using strong AES-256-CTR with Poly1305 encryption.

The only time that the data is decrypted is during a restore. This means whether you need to provide a backup, the combination of Wasabi Hot Cloud Storage's CJIS, HIPAA and GDPR compliance and data immutability coupled with Comet Backup's end to end encryption ensures peace of mind for security, data integrity and compliance.

The additional benefits of utilizing Wasabi Hot Cloud Storage with Comet Backup are:

- It's 80% less expensive and faster than first generation cloud storage vendors.
- Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone.
- There are no fees for egress or API requests.
- Wasabi keeps all data "hot" so it can be accessed in milliseconds.

When using Comet Backup in conjunction with Wasabi Hot Cloud Storage, service providers can easily design, create and deploy a robust and reliable backup platform to suit any business or customer base.

KEY FEATURES

- Fully rebrandable, make it your own
- Monthly usage-based pricing
- Comprehensive, always up to date API
- Customizable, deploy to suit your business

BENEFITS

- Fast, secure bandwidth efficient backups and restores
- Deduplication ensures that there is no bloat in your storage usage or costs
- Scalable pricing, you only pay for what you use
- 100% channel, Comet doesn't compete with you
- Backup directly from your customer sites to Wasabi Hot Cloud Storage

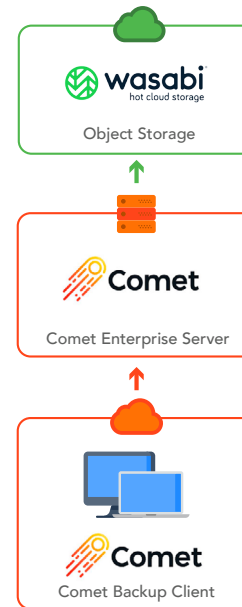

About Comet Backup

Founded in 2015 and launched in February 2017, Comet is light-weight, fast, rebrandable backup software. Comet prides itself on being 100% focused on developing Comet for the service provider industry only. Comet provides a secure, encrypted backup system that lets customers backup to the storage destination of their choosing. Comet is proud to integrate with technologies and storage providers such as: Amazon AWS, Google Cloud Storage, Microsoft Azure, Backblaze B2, Wasabi, Let'sEncrypt, OpenStack and more.

ABOUT WASABI

Wasabi is the hot cloud storage company delivering disruptive storage technology that is 1/5th the price of Amazon S3 and faster than the competition with no fees for egress or API requests. Unlike first generation cloud vendors, Wasabi focuses solely on providing the world's best cloud storage platform. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is on a mission to commoditize the storage industry. Wasabi is a privately held company based in Boston, MA.
